**WHAT'S NEW:**

- After 2001 working offsite/ and finishing with 6 winery sites around Barossa in 2006, we have now built a new insulated ferment/ storage cellar with adequate crushing facility, whereby any of the larger parcels of fruit will still be taken offsite for processing and brought home for the last stages of production and maturation.
- I am very proud to be able to do this and be master of our own destination. Over the next years we will only be displaying wines from our own specifically grown vineyard, grown by us, worked and harvested, fermented, matured, blended and bottled BY US.
